

SETTING UP AN "XBOX" FOR A CABLE MODEM

1. Turn off "Xbox" and unplug the cable modem.
2. Power cycle modem, and then turn on "Xbox" with no disk in the tray.
3. From the Xbox dashboard choose "Xbox live."
4. You should see "Congratulations! You are connected to Xbox Live!"
5. Continue through the sign-up process for Xbox Live.

If the connection doesn't work, a troubleshooting screen should appear on your TV.

Note: You will also need to have the Xbox Live upgrade kit to connect. You can connect Xbox Live up to a router or Windows ICS. See the Xbox instructions for details.

SETTING UP A PLAYSTATION 2 FOR A CABLE MODEM

1. Using the on-screen keyboard, enter a name for a new network connection when asked.
2. When asked if you have an Internet connection, choose "Yes" and press the "X" button.
3. Choose "High Speed Connection (Cable or DSL)" then press the "X" button.
4. Choose "Automatic Settings (Cable or DSL)" then press the "X" button.
5. When you choose "Automatic Settings" you will be asked for a hostname. Leave this blank.
6. At this point the network adaptor should test the connection. If it works, press the "X" button and save it to the memory card.
